

Hey guys, here's every selectable item in the game!

This time we need to worry about the length of their names, so they can fit into the user interface.

Max length for the World names is not particularly important.

Max length for the Level, cheats, handicaps names should be around:

" "

Achievements can probably be the longest, at around:

" "

Max length for the names of weapons and costumes:

" "

You don't really have to worry about descriptions being too long, unless they are considerably larger.

Weapon, costume, world and level names are quite arbitrary and aren't referenced anywhere else, so you don't have to translate them very accurately, just use something that sounds similar.

Cheats and handicaps, and references to mechanics like Bombs, may be used in achievements and dialogue, so you should make sure these are consistent.
